SUPPLEMENT TO REPORT NO.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

(Approved by Ministry for Higher Education
as textbook for veterinary schools)

	<u>Page</u>
Introduction	3
General Information	3
Significant Stages in the Development of Microbiology	5
Relationship of Microbiology to Other Sciences	11
Part 1. General Microbiology	
I. Morphology of Microbes	
Systematic Classification of Microbes	13
Structure of Microbes	17
Fissionable Fungus	21
Mold	22
Yeast	23
Irridescent Fungus	23
Filarial Bacteria	23
Filterable Virus	24
II. Physiology of Microbes	
General Information	25
Chemical Composition of Microbes	26
Nutrition of Microbes	27
Respiration of Microbes	29
Chemical Affinity of Microbes	33
Motility of Microbes	34
Propagation of Microbes	35
Conversion and the Cycle of Matter in Nature and the Role of Microbes in These Processes	36

SECRET

SECRET

50X1-HUM

Natural Resistance of Microbes and Their Reaction to Physical and Chemical Factors	43
Antiseptics	53
Biological Methods for Killing Microbes	54
Variability of Microbes	55
Distribution of Microbes in Nature	56
III. Infection and Immunity	
Studies on Infection	57
Infectiosity, Toxicity, Contagiosity, Pathogenicity and Virulence of Microbes	69
Infection Nidi of Animals and Methods for Isolating Microbes from an Organism	71
Specificity of Infectious Diseases	73
Spreading of Pathogenic Microbes in an Organism	74
Course of Infectious Diseases	75
Types of Infectious Diseases	76
Studies on Immunity	78
Antigens and Antibodies	88
Anaphylaxis and Allergy	93
Practical Application of Theoretical Conceptions on Immunity for the Prophylaxis and Therapy of Infectious Diseases	98
IV. Bacteriological and Serological Technology (Practical Ex- perience in General Microbiology)	
Methods for Studying Microbes	107
The Microscope, Its Construction and Use	108
Procedure for Microscopic Examinations	112
Staining Methods	115
Study of Living Microbes	121
Sterilization of Laboratory Glassware, Instruments, Culture Media, and Materials	124
Preparation of Culture Media	133
Preparation of Pure Strains	138
Technology of Transplanting Microbes on Culture Media	141
Cultivation of Anaerobes	143
Nature of the Development of Microbes on Culture Media	145
Thermostats	146
Determining the Concentration of Hydrogen Ions	147
Technology of Determining the Concentration of Hydrogen Ions (pH) of Culture Media	149
Infection of Laboratory Animals	150
Surgical Procedures on Laboratory Animals	153
Selection, Preserving, Packing, and Dispatching of Materials To Be Studied	155
Obtaining Pathogenic Materials of Various Infectious Dis- ease Cases	158
Serological Reactions	161
Part 2. Specific Microbiology	
V. Causative Agents of Anthrax	
VI. Causative Agents of Anaerobic Infections	
General Characteristics	194
Causative Agents of Malignant Nidi	195
Causative Agents of Emphysematous (Rauschbrand B., B. Anthraxis Symptomati); Carbuncles of Large Horned Cattle	200
Causative Agents of Tetanus	205
Bacillus Botulinus	208
Microbes Responsible for Necrobacillosis	212

50X1-HUM

VII.	Causative Agents of Swine Erysipelas, Pasteurellosis and Brucellosis	
	Causative Agents of Swine Erysipelas	214
	Pasteurellosis	218
	Brucellosis	223
	Causative Agents of Brucellosis in Large Horned Cattle	224
	Differential Diagnosis of Various Forms of Brucellosis	225
VIII.	Causative Agents of Glanders and Glanderslike Diseases	
	Causative Agents of Equine Glanders	231
	Causative Agents of Epizootic Equine Lymphangitis	237
	Causative Agent of Ulcerous Equine Lymphangitis	239
IX.	Typhoid and Paratyphoid Bacilli	
	General Characteristics	241
	Coli Bacilli in Calves	246
	Causative Agents of Calf Paratyphoid	247
	Causative Agents of White Diarrhea in Chicks	248
	Causative Agents of Infectious Abortion in Colts	250
	Causative Agents of Meat Poisoning in Humans (Those Microbes Belonging to the Group of Paratyphoid Bacilli)	251
X.	Causative Agents of Suppurative Diseases	
	General Characteristics	253
	Staphylococcus	254
	Streptococcus	258
	Micrococcus	265
	Diplococcus Lanceolatus (D. Pneumoniae)	266
	Pyogenic Bacilli	267
XI.	Causative Agents of Tuberculosis	
	Variations of Tubercle Bacillus	271
	Bacteriologic Diagnoses	274
	Allergy Tests	280
	Immunity	282
	Microbes Causing Paratubercular Enteritis in Horned Cattle	283
	Causative Agents of Pseudotuberculosis	284
XII.	Causative Agents of Fungus Diseases	
	Causative Agent of Ringworm	286
	Causative Agents of Mange	289
	Causative Agents of Actinomycosis	290
XIII.	Filtrable Virus	
	General Characteristics	294
	Rabies Virus	296
	Virus of Peripneumonia in Large Horned Cattle	302
	Hoof and Mouth Disease Virus	307
	Swine Plague Virus	310
	Horned Cattle Plague Virus	312
	Canine Plague Virus	314
	Smallpox Virus	314
	Calf Smallpox Virus	315
	Bird Plague Virus	316
	Equine Encephalomyelitis Virus	318
	Equine Infectious Anemia Virus	319
	Pseudorabies Virus	321
	Bibliography	323
